BDLive - The JSE edged higher in line with world markets Wednesday as investors took heart from strong corporate earnings in the US, but the mood remains cautious as uncertainty about inflation, the global economy and Covid-19 persist.

The all share reached its best level in more than a month in intraday trade and ended the day 0.18% higher at 66,894.79 points, boosted by industrials precious metals and banks. However, the gains were limited by weaker food producers, listed property stocks, retailers and industrial metals. Shares in Europe squeezed eked out gains on Wednesday as investors kept faith in the global economic recovery while monitoring corporate earnings.

Government bond yields rose and the yen fell to its lowest in four years against the dollar.

The regional Euro Stoxx 600 added 0.1% after opening in negative territory, amid a somewhat mixed picture for earnings, with investors largely upbeat. German stocks also turned positive, adding as much as 0.3%.

BDLive - Bengaluru — Gold prices rose on Wednesday, buoyed by a slightly weaker dollar that offset surging US bond yields and the lingering fear over sooner-than-expected interest rates hikes.

Spot gold rose 0.3% to \$1,773.65/oz by 3.41am GMT. The metal rose as much as 1.2% on Tuesday before giving up most of those gains as treasury yields rallied. US gold futures gained 0.2% to \$1,773.70. US benchmark 10-year treasury yields surged to their highest since May 20 on Wednesday, raising the opportunity cost of holding non-yielding bullion.

But offsetting higher yields was a softer dollar index that made bullion cheaper for buyers holding other currencies. "Gold continues to hang in there, but I think the writing is on the wall and as soon as the Fed makes a more hawkish pivot, gold could ignore higher inflation and trend lower," said Stephen Innes, managing partner at SPI Asset Management.

FarmFutures - Corn prices soared 1.75% higher on demand optimism, with ethanol production reaching the highest levels in more than two years, and with traders hoping for a bullish set of export data from USDA tomorrow morning. Spillover strength from other commodities provided additional aid today. December futures rose 9.5 cents to \$5.3975, with March futures up 9.75 cents to \$5.4875.

Corn basis bids were mostly steady to weak on Wednesday, dropping 2 to 11 cents at three interior river terminals and falling 2 cents at an Indiana ethanol plant today. An Iowa processor bucked the overall trend after climbing 10 cents higher.

Ethanol production moved higher for the third consecutive week, per the latest data from the U.S. Energy Information Administration, out earlier today. For the week ending October 15, daily volume averaged 1.096 million barrels. It was also the biggest weekly tally since June 2019, meaning production has officially climbed back to pre-pandemic levels. Inventories moved to a three-week high of 20.08 million barrels.

Ahead of the next export report from USDA, out early tomorrow morning, analysts think the agency will show corn sales ranging between 27.6 million and 55.9 million bushels for the week ending October 14.

China is making moves to ensure chemical fertilizer producers have access to adequate coal, electricity, natural gas and sulphur to ensure it has adequate domestic reserves. China also plans to improve capacity and rail transport capabilities.

FarmFutures - Wheat prices made solid inroads Wednesday after a round of technical buying pushed most contracts 1.5% and 1.75% higher by the close. Gains in a broad range of outside markets generated some additional tailwinds today. December Chicago SRW futures gained 13.75 cents to \$7.4975, December Kansas City HRW futures rose 11.25 cents to \$7.5950, and December MGEX spring wheat contracts climbed 16.25 cents to \$9.9050. Ahead of the next export report from USDA, out Thursday morning, analysts expect the agency to show wheat sales ranging between 9.2 million and 24.6 million bushels for the week ending October 14. Ukraine's agriculture ministry has struck a deal with grain traders to increase the country's wheat export quota to 929.6 million bushels during the 2021/22 marketing year as it braces for record-breaking grain production this year. That puts the quota around 44% above 2020/21 levels. Jordan purchased 2.2 million bushels of milling wheat from optional origins in a tender that closed earlier today. The country has cancelled similar tenders in recent weeks due to low participation, but this tender brought five offers. The grain is for shipment in January.

FarmFutures - Soybean prices trended 1.5% higher on a round of technical buying largely supported by demand optimism, although USDA will need to show solid exports in its weekly report tomorrow morning to keep the momentum moving in a positive direction. Today, November futures climbed 18 cents to \$12.46, with January futures rising 18.75 cents to \$12.5575.

Soybean basis bids showed quite a bit of variability Wednesday after trending 6 to 22 cents lower at three interior river terminals while jumping 5 to 15 cents higher at three other Midwestern locations today.

Analysts are expecting to see another big round of soybean exports this past week. Ahead of Thursday morning's export report from USDA, trade guesses for soybeans ranged between 55.1 million and 92.6 million bushels for the week ending October 14. Analysts also anticipate soymeal sales ranging between 150,000 and 410,000 metric tons, plus another 4,000 to 35,000 MT in soyoil sales.

Preliminary volume estimates were for 253,708 contracts, tilting slightly lower than Tuesday's final count of 262,071.
